

Test Analysis Report

Project Name: Guru99 Bank Automation Testing Framework

GitHub URL: https://github.com/ShivDayalSingh02/Wipro_SDET_Capstone_Project

Objective

To automate the functional testing of the Guru99 Bank application using Selenium WebDriver, TestNG, Maven, Jenkins, Page Object Model (POM), Extent Reports, and Docker-ready CI/CD architecture.

Test Execution Summary	Metric	Value
------------------------	--------	-------

Total Test Cases	12
------------------	----

Executed Test Cases	12
---------------------	----

Passed Test Cases	12
-------------------	----

Failed Test Cases	0
-------------------	---

Blocked Test Cases	0
--------------------	---

Pass Percentage	100%
-----------------	------

Fail Percentage	0%
-----------------	----

Module-wise Execution	Status
-----------------------	--------

Login Module	3/3 Passed
--------------	------------

Customer Management	1/1 Passed
---------------------	------------

Account Management	1/1 Passed
--------------------	------------

Deposit Transaction	2/2 Passed
---------------------	------------

Withdrawal Transaction	2/2 Passed
------------------------	------------

Fund Transfer	3/3 Passed
---------------	------------

Functional Validation Performed Login Module

- Valid Login Verification
- Invalid Login Validation
- Empty Login Validation

Customer Module

- New Customer Creation
- Customer ID Validation

Account Module

- New Account Creation
- Account Details Verification

Transaction Module

- Deposit Transaction
- Withdrawal Transaction

Fund Transfer Module

- Valid Fund Transfer
- Invalid Account Validation
- Insufficient Balance Validation

Test Coverage Analysis Percentage

Functional Testing	100%
Smoke Testing	100%
Regression Testing	100%
UI Validation	95%
Negative Testing	100%
Cross Browser Testing	50%

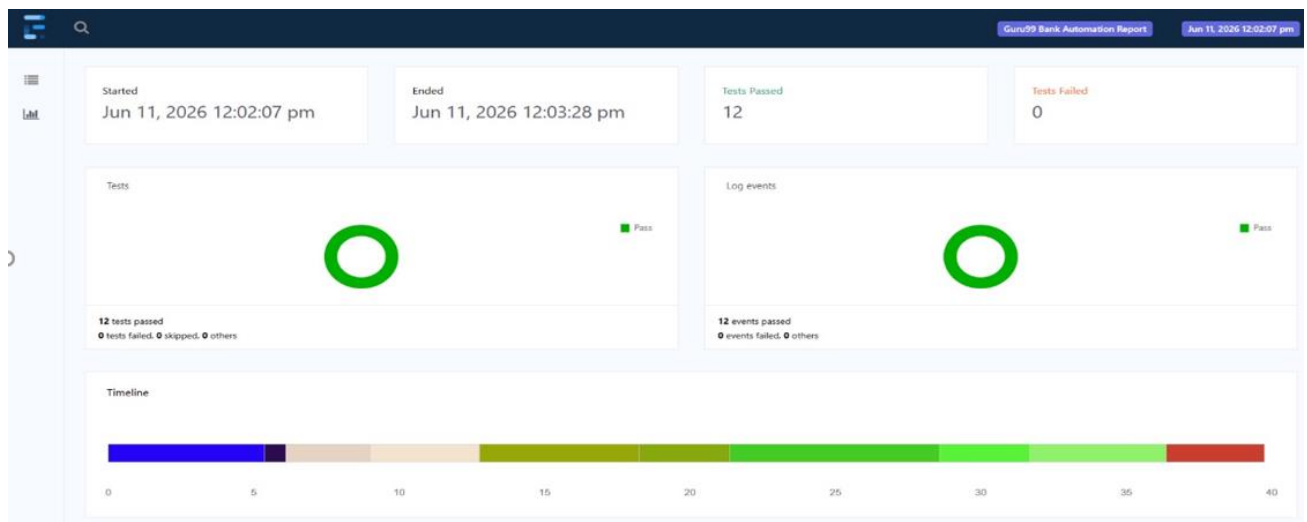

Cross Browser Status

- Chrome Browser Executed Successfully.
- Edge Browser Configuration Available and Ready.
- Framework supports browser selection through configuration file.

Extent Report Analysis

The Extent Report dashboard provides a comprehensive summary of the Guru99 Bank Automation Framework execution. It shows the overall execution status, start and end timestamps, graphical test statistics, execution timeline, and environment information. During execution, all 12 test cases passed successfully, resulting in a 100% pass rate with zero failures and zero skipped tests.

The detailed test view lists every executed test case including Login, Customer Creation, Account Creation, Deposit, Withdrawal, Fund Transfer, Invalid Account Validation, and Insufficient Balance Validation. Each test is marked with a Pass status along with execution duration and timestamps, confirming successful validation of all major banking functionalities. The report also captures execution metadata such as tester information and provides an easy-to-read visual representation of the automation run, making it useful for project tracking, defect analysis, and management reporting.

TestNG Report Analysis

The TestNG Report provides a detailed execution summary of the Guru99 Bank Automation Test Suite. The report confirms that **12 test methods were executed successfully**, with **12 passed, 0 failed, 0 skipped, and 0 retried**, demonstrating complete functional validation of the application without any execution issues.

The report covers all major banking operations including Login Validation, Customer Creation, Customer ID Validation, Account Creation, Account Details Verification, Deposit, Withdrawal, Fund Transfer, Invalid Account Handling, and Insufficient Balance Validation. Each test case is displayed with a green pass status, indicating that the expected results matched the actual application behaviour. The successful execution of all test scenarios confirms the stability, reliability, and correctness of the Guru99 Bank application under the tested conditions.

Results	
12 methods, 12 passed
